Introduction to Unifrog: Parents Evening

What is Unifrog?

Unifrog is an online platform designed to support young people to make informed decisions about their futures.

They partner with schools to provide a range of online tools and lessons to help students explore their interests, find their best next step, and apply successfully.

The online platform is suitable for all students from Year 7 all the way up to Year 13 and beyond.

We're going to look at some of the tools suitable for each year group, and some of the opportunities available to students.

Suggested tools for KS3

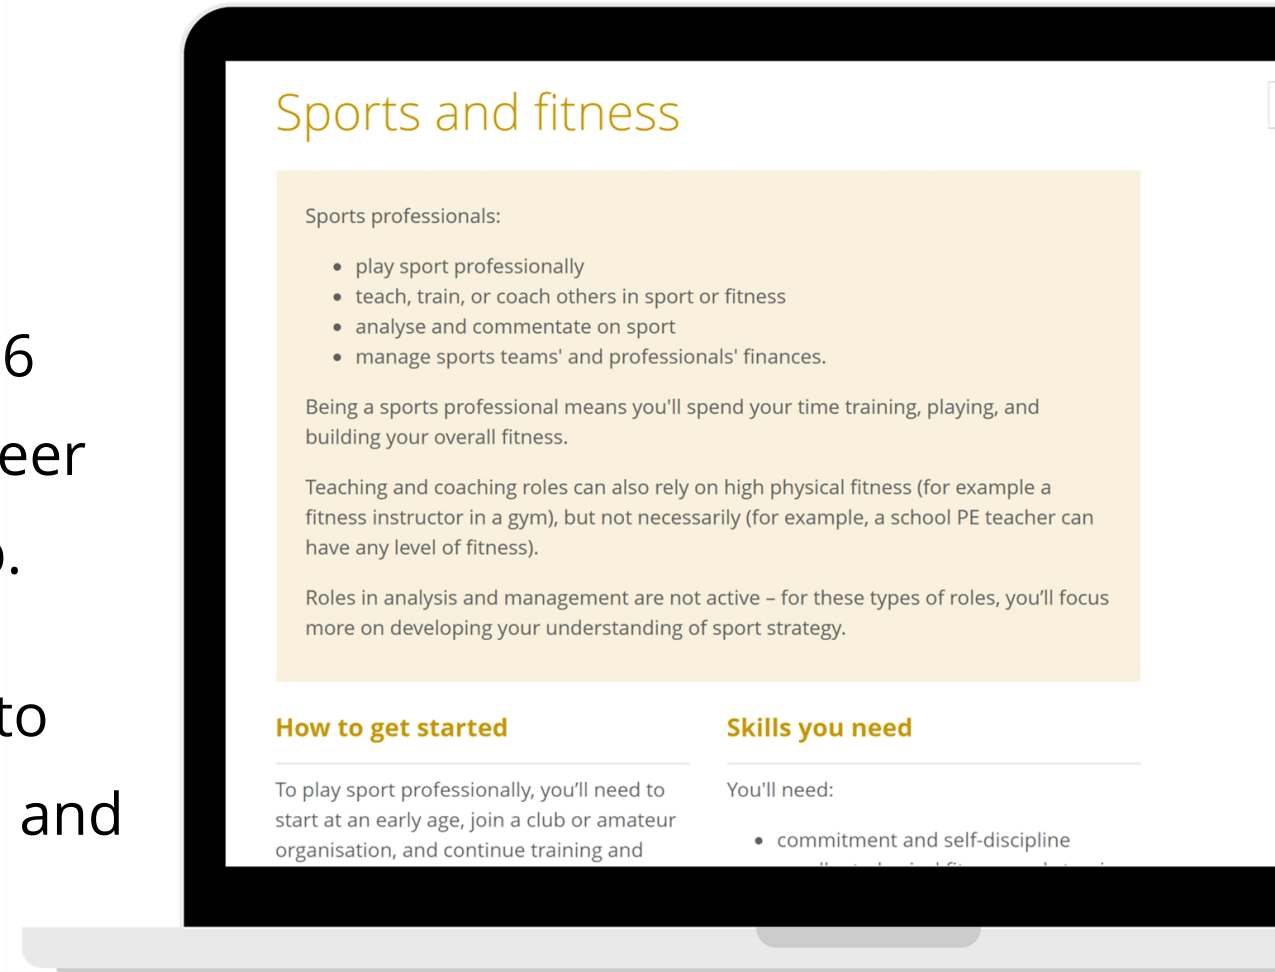

Unifrog makes tool suggestions based on students' ages and interests, as well as their experience with other schools. All students can explore all the tools available to our school.

The Career Sectors library

In KS3, exploring careers should be about discovering all the opportunities out there.

Unifrog has grouped its career profiles into 56 sector profiles to help students explore a career area without needing to focus on a single job.

Each profile includes a sector overview, how to get started, the skills you'll need, useful links, and up-to-date labour market information.

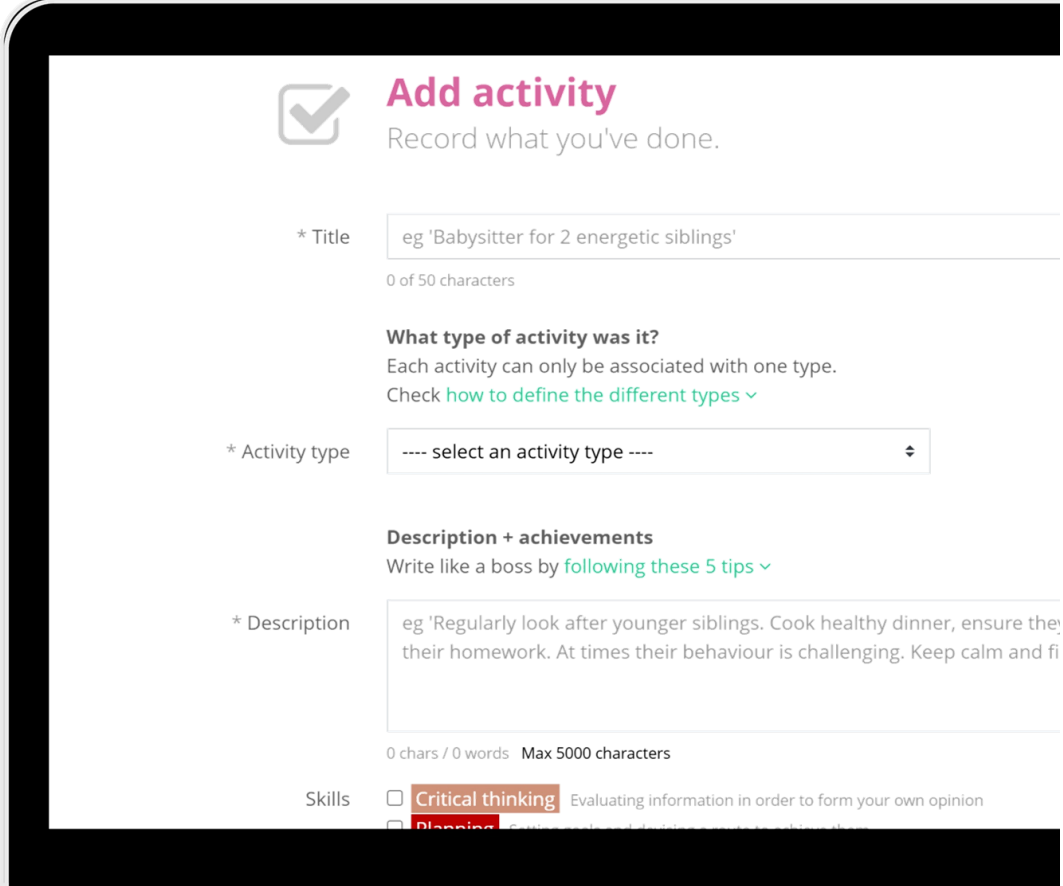

The Activities tool

Students can start building a portfolio of academic and extracurricular activities.

They can use this tool to record and remember all the great work they've been doing, whether in class, on a sports team, in private music lessons, volunteering, or something else.

They can also use their record to reflect on their journey so far to see what they're good at, what they like doing, and what they want to do next.

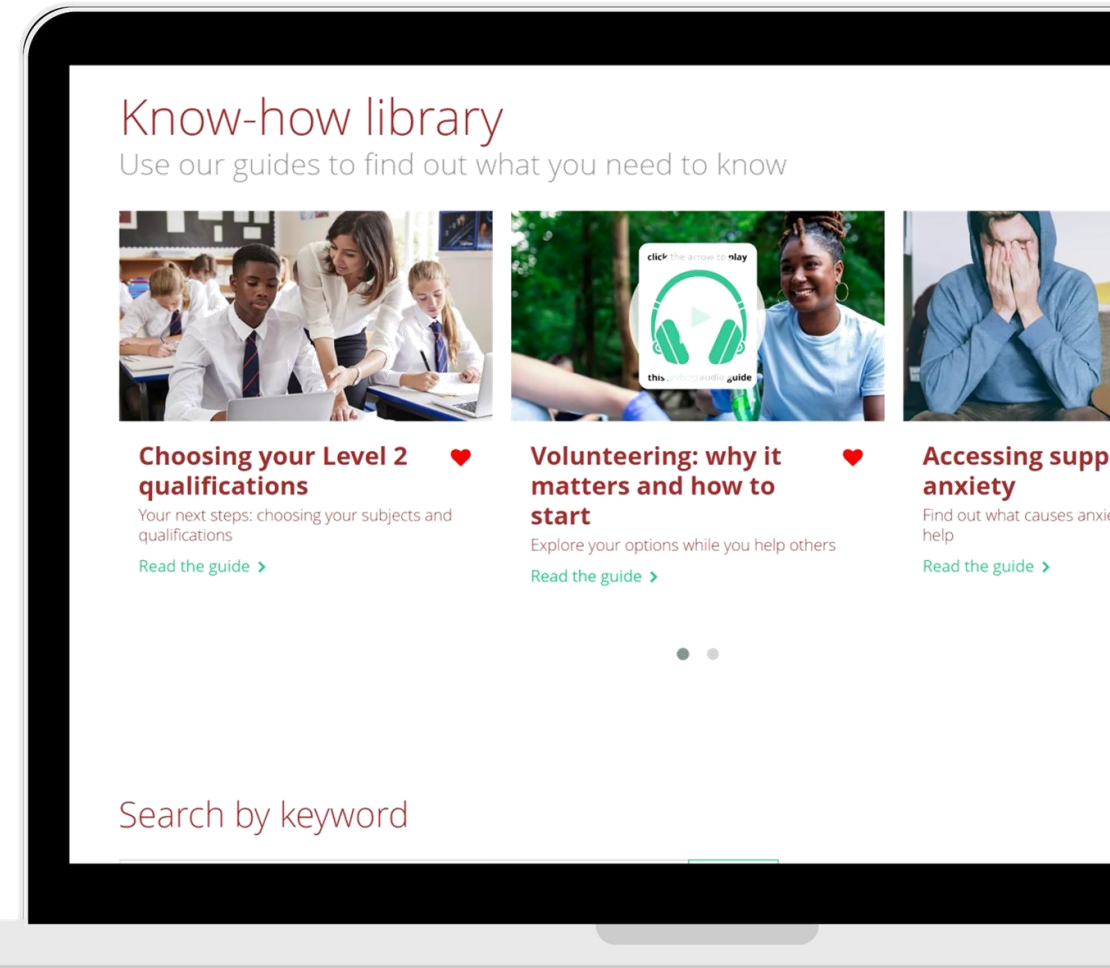

The screenshot shows the 'Add activity' form on a laptop screen. At the top, there is a checkmark icon and the title 'Add activity' in pink, followed by the subtitle 'Record what you've done.' Below this, the form has several sections: 1. '* Title' with a text input field containing 'eg 'Babysitter for 2 energetic siblings'', a character count '0 of 50 characters', and a note 'Each activity can only be associated with one type. Check [how to define the different types](#)'. 2. '* Activity type' with a dropdown menu showing '---- select an activity type ----'. 3. '* Description' with a text area containing 'eg 'Regularly look after younger siblings. Cook healthy dinner, ensure they do their homework. At times their behaviour is challenging. Keep calm and fi...', a character count '0 chars / 0 words Max 5000 characters', and a note 'Write like a boss by [following these 5 tips](#)'. 4. 'Skills' with checkboxes for 'Critical thinking' (with description 'Evaluating information in order to form your own opinion') and 'Planning' (with description 'Setting goals and devising a route to achieve them').

The Know-how library

Sometimes, students need a little bit of guidance. The Know-how library is full of expert advice and guidance tackling a range of topics from mental health, to academic support, to industry insights.

Some of Unifrog's popular guides include:

- Get on the ladder: sport and fitness
- Skills: what are they and why do they matter?
- Understanding autism

Suggested tools for KS4

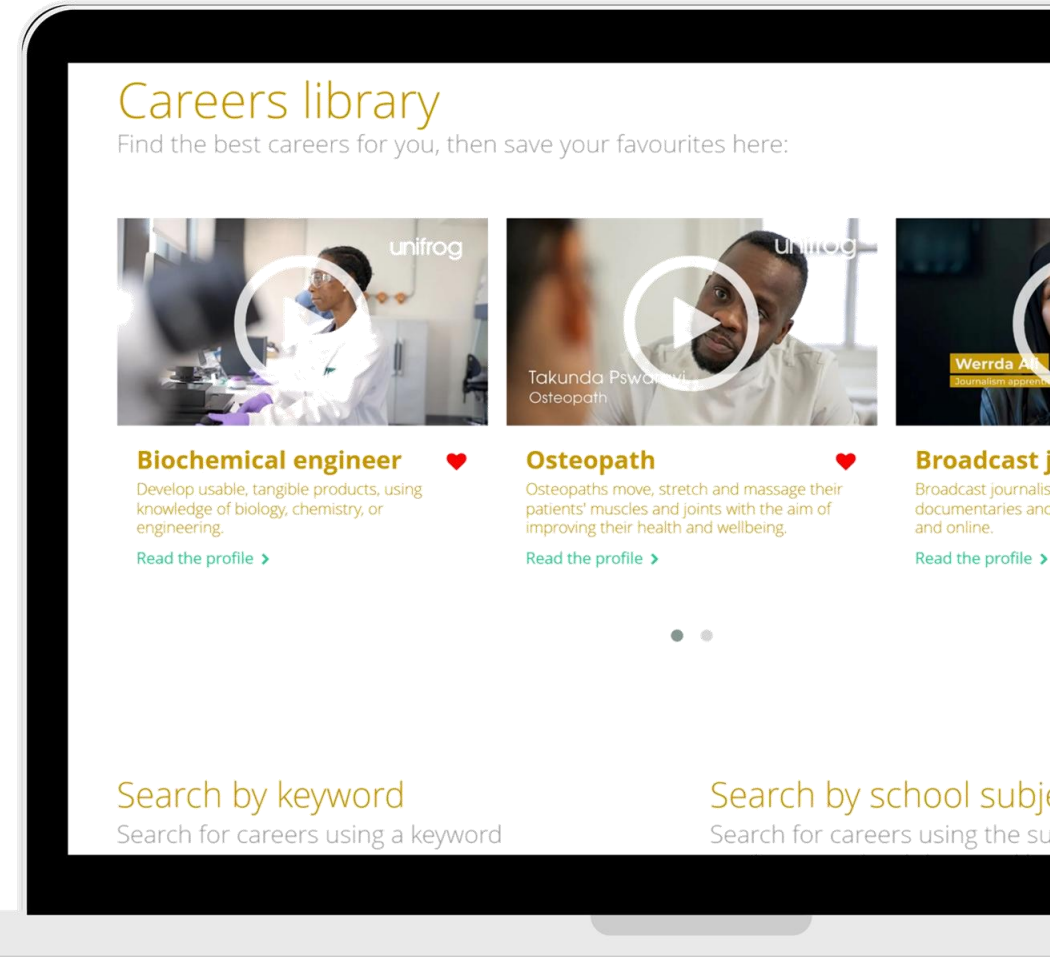

Unifrog makes tool suggestions based on students' ages and interests, as well as their experience with other schools. All students can explore all the tools available to our school.

The Careers library

Students can explore over 600 careers and read up on key details like:

- Typical duties
- Necessary skills and qualifications
- Local and national labour market information

They can also watch videos with industry experts who share their own journeys and some of their favourite and least favourite parts of their jobs.

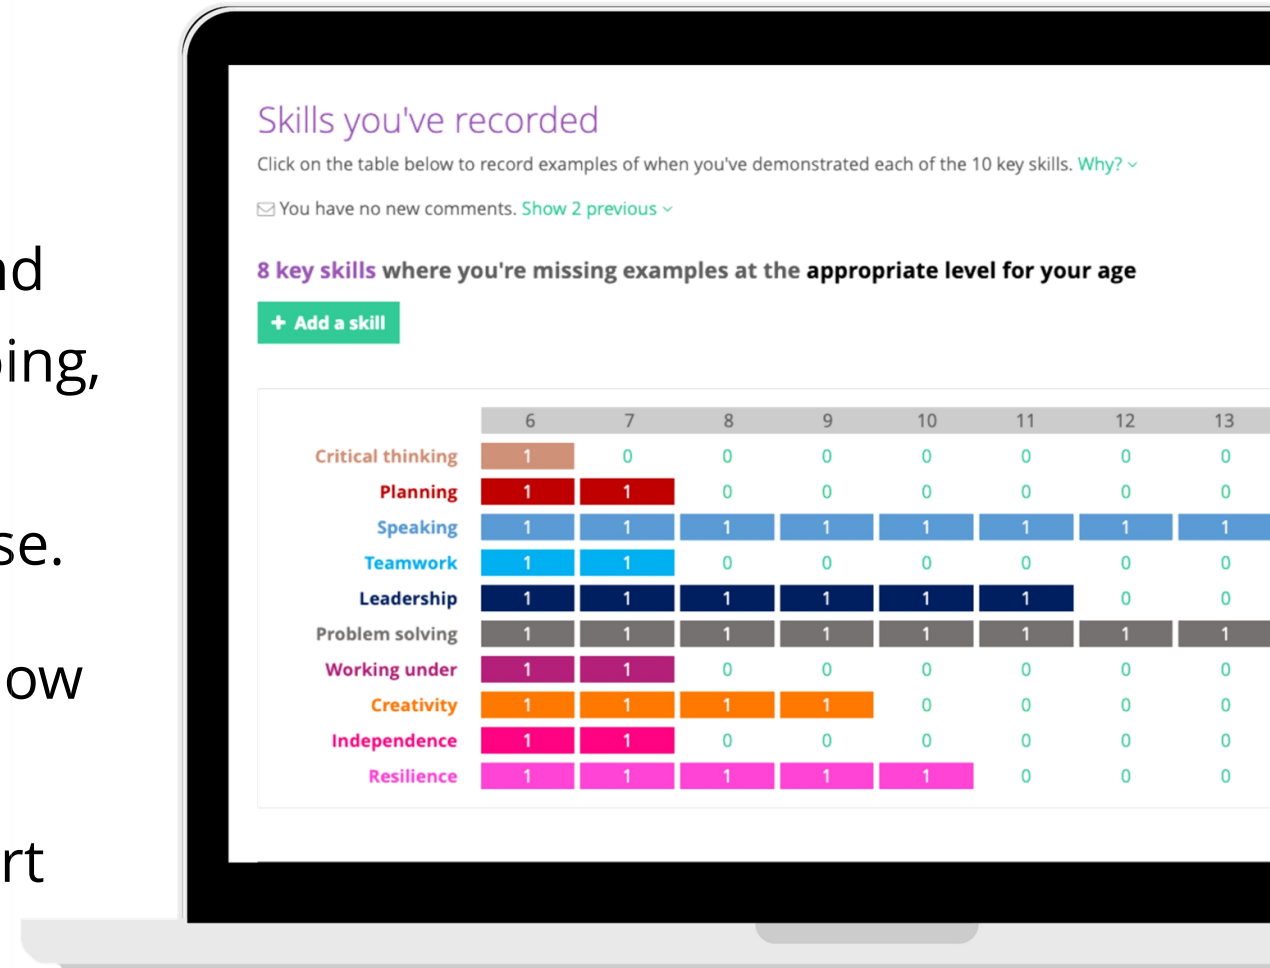

The Skills tool

Students can start building a portfolio of academic and extracurricular skills.

They can use this tool to help them record and remember all the great work they've been doing, whether in class, on a sports team, in private music lessons, volunteering, or something else.

They can use the related resources to learn how to build on their skills, and pull them straight through to their CV when they're ready to start applying.

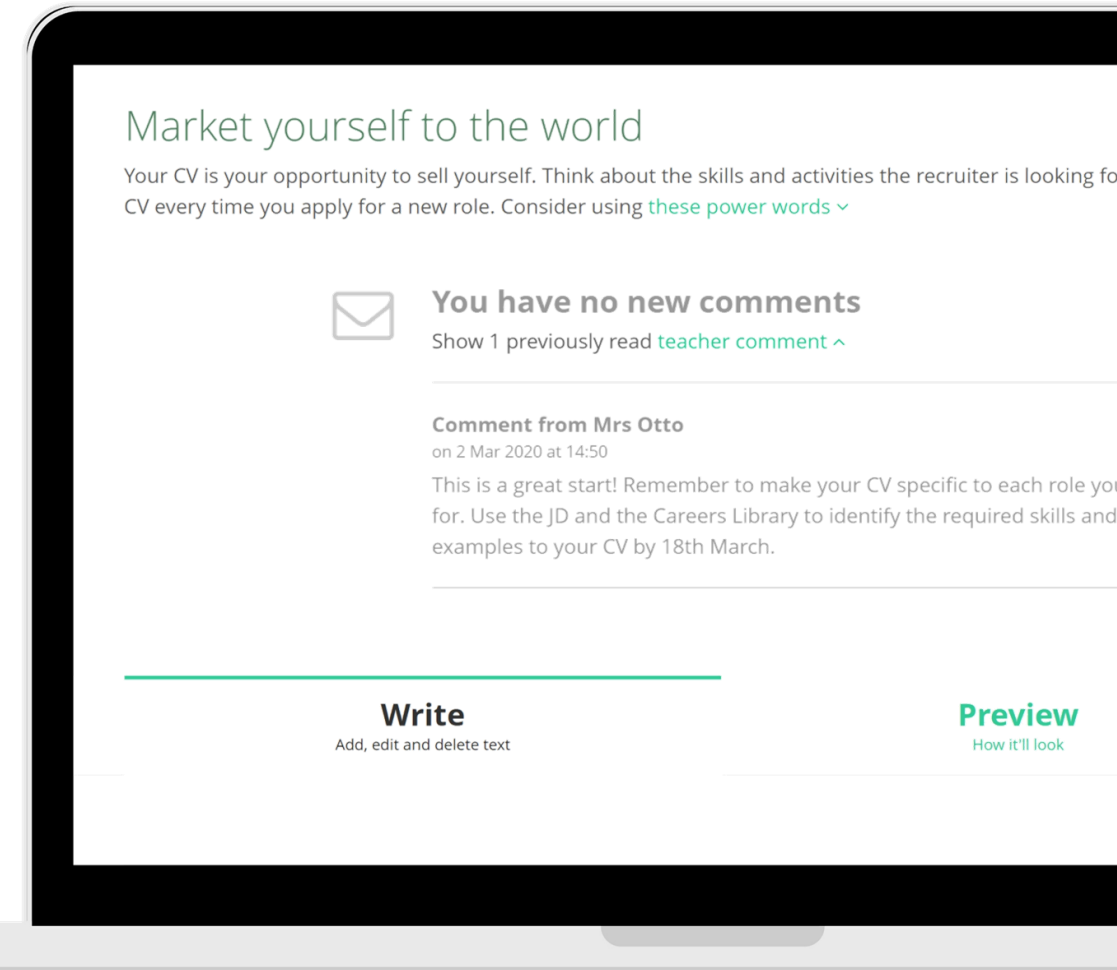

The writing tools

Students can write their CV, cover letter, and more using Unifrog's writing tools.

Each type of application has top tips to support students with the writing process.

Teachers can also read students' work and provide feedback on it directly on the platform.

Unifrog automatically saves all students' work, meaning no more losing data and having to start over!

Suggested tools for KS5

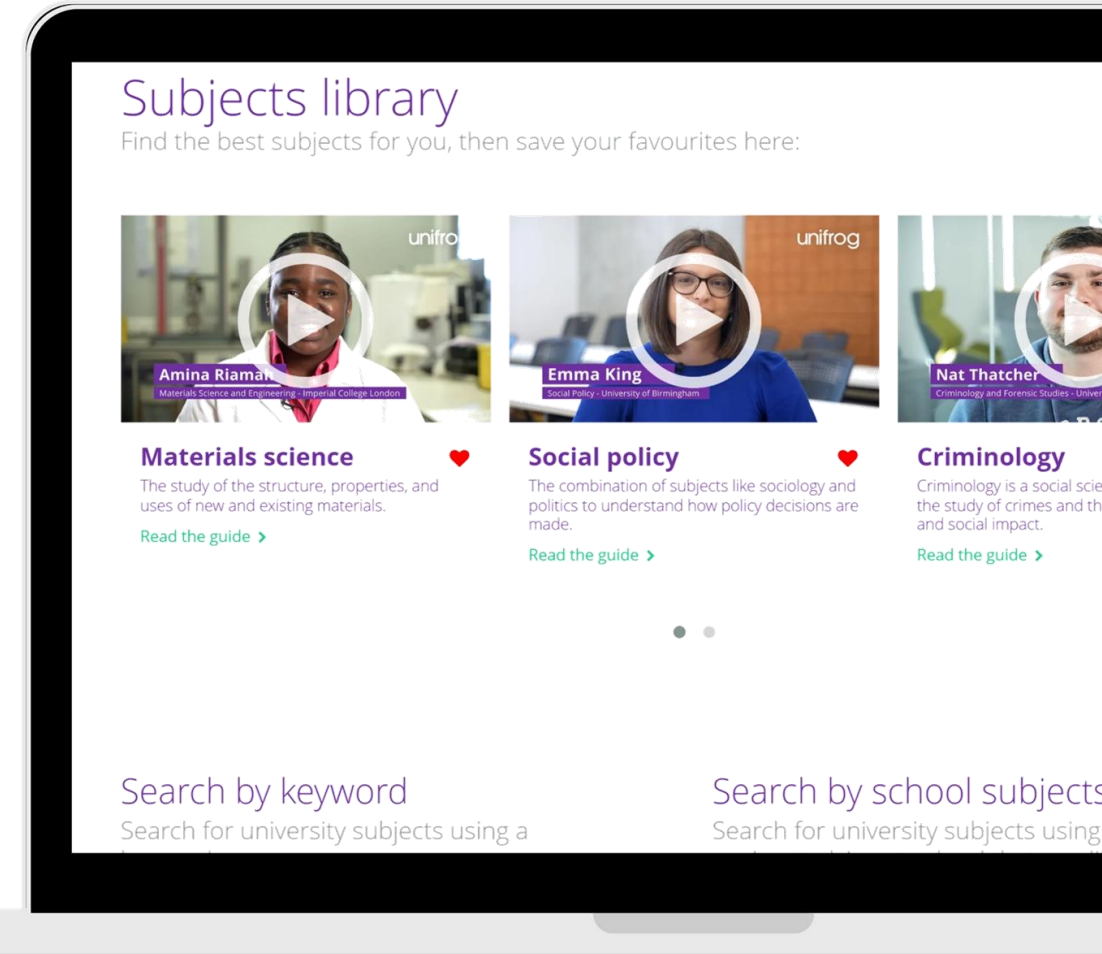

Unifrog makes tool suggestions based on students' ages and interests, as well as their experience with other schools. All students can explore all the tools available to our school.

The Subjects library

Students can explore over 100 university-level subjects and read up on key details like:

- What it means to study this subject at a higher level
- Recommendations for wider reading to support their applications
- Interesting facts, including cross-curricular topics

They can also watch videos with real students to find out what it means to study the subject.

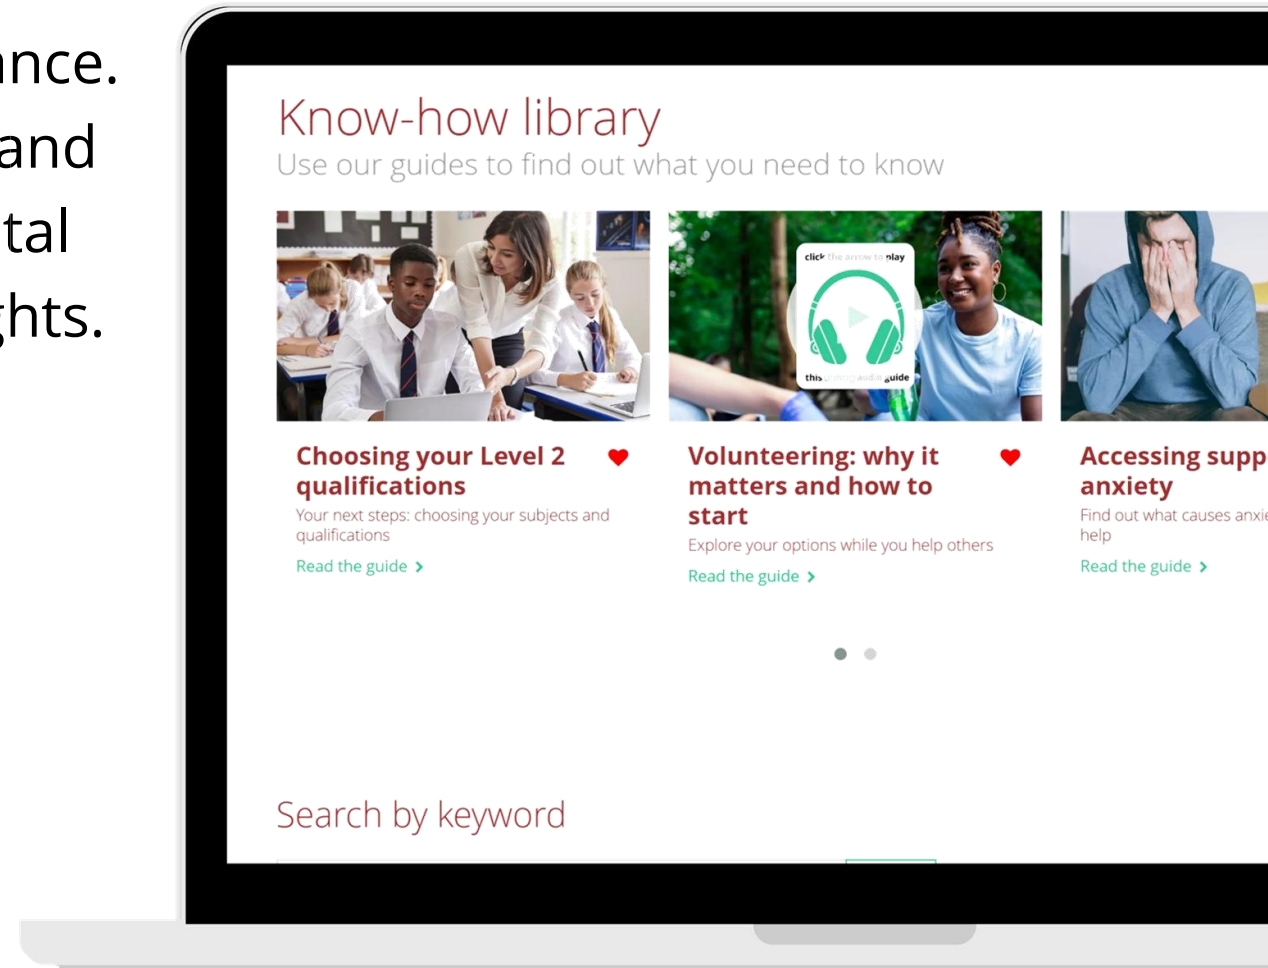

The Know-how library

Sometimes, students need a little bit of guidance. The Know-how library is full of expert advice and guidance tackling a range of topics from mental health, to academic support, to industry insights.

Some of Unifrog's popular guides include:

- Example personal statements
- University and employer profiles
- Advice on entering the work of work
- Details of student funding

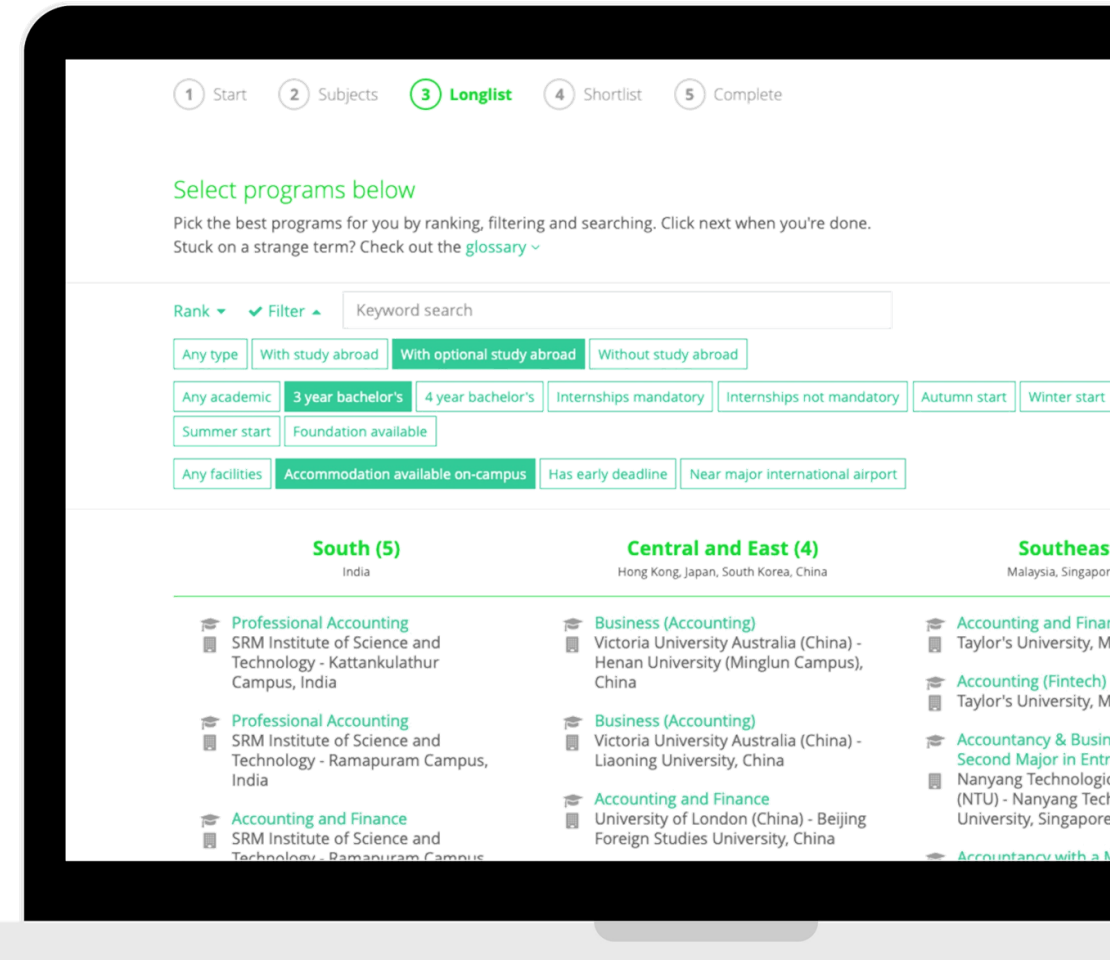

The search tools

Students can search for live apprenticeships and university courses taught all over the world, using the filter and rank options that are important to them, like:

- Type of university
- Duration of apprenticeship
- Distance from home
- % in work or education following completion

They can save their favourites on a shortlist to come back to when they're ready to apply.

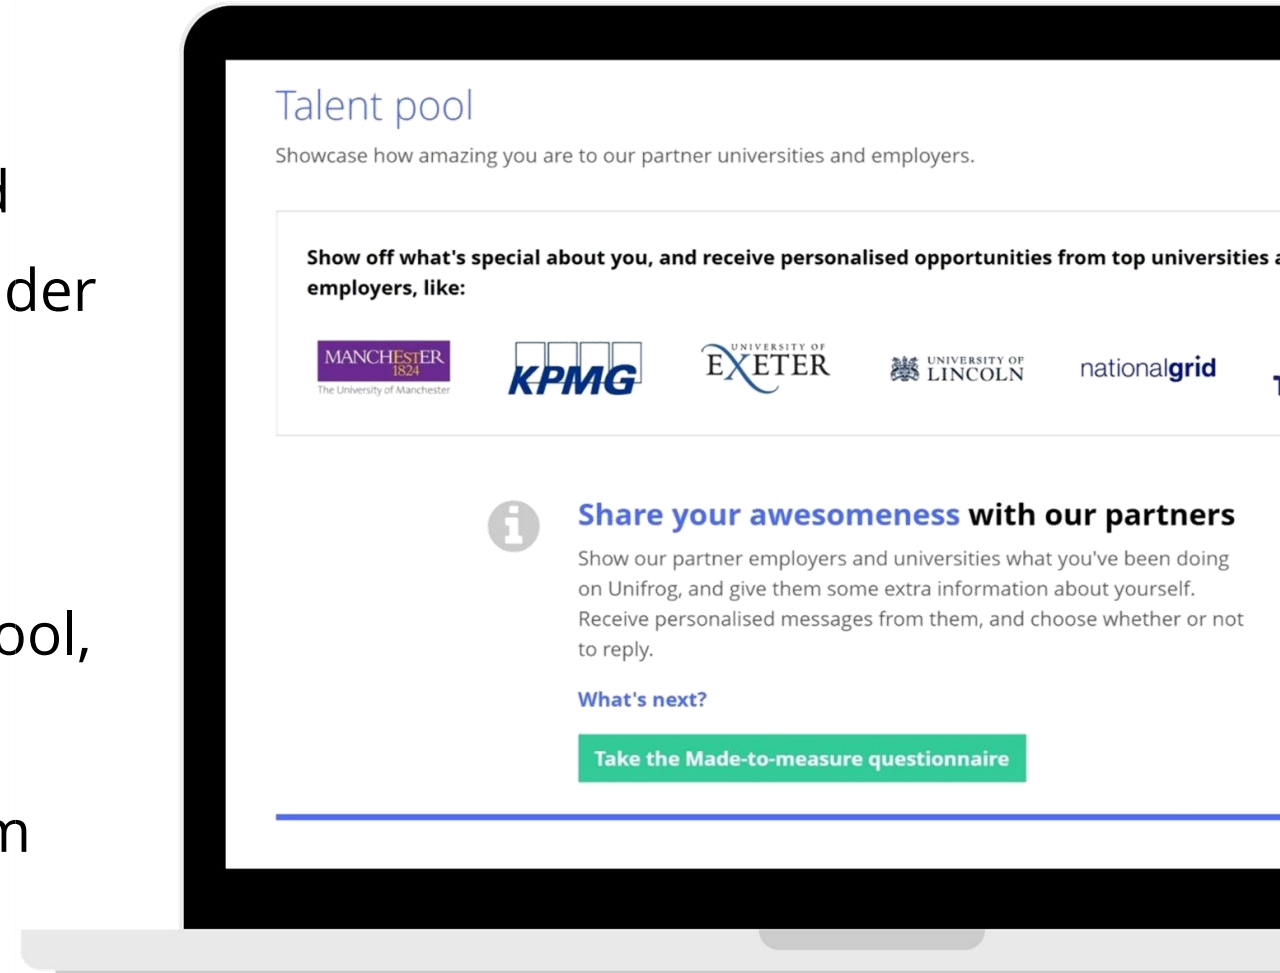

unifrog

Important information

The Placements tool and Talent pool

Unifrog's Placement tool allows students in Years 10-13 to organise work experience and placements directly from the platform, all under the supervision of a parent/caregiver and teacher.

Students in Years 12-13 can join the Talent pool, meaning Unifrog's partner universities and employers can get directly in touch with them with relevant opportunities.

GDPR

GDPR is a regulation in EU law on data protection and privacy for everyone within the European Union and the European Economic Area.

Unifrog takes data security very seriously. They have several features in place to protect school and student data.

They only use EU data centres, have multiple firewalls, layered-access security, and more. Information on this can be found at unifrog.org/about#security.

Parents and caregivers: get signed up!

Why should students have all the fun?! You can create your own account and access the tools in the same way students do!

Scan this QR code or go to www.unifrog.org/student and click 'Sign in for the first time'. You'll be asked for some details and a Sign up Code. The code for our school is **HEASfamily**

After signing up, log into Unifrog using your email address and password via the student sign-in page!

A screenshot of a mobile app interface for Unifrog. At the top, the 'unifrog' logo is in green on the left and a hamburger menu icon is on the right. Below the logo, the text 'Student account Sign up Code' is displayed, with 'Student account' in red and 'Sign up Code' in black. A paragraph of text explains that users should fill in this form to create an account, noting that Sign up Codes expire 90 days after creation. At the bottom, there are two input fields: the first is labeled '* Sign up Code' and is highlighted with an orange border; the second is labeled '* First name'.

One last thing...

You can keep up to date with the latest news and opportunities, along with Unifrog content just for parents by signing up to the Next Steps Newsletter!

Once you create an account, go to your Settings and click 'Yes, I'd like to subscribe!'.
